VERSATILE COMBINATION PUMP

- **Dual-displacement combination piston and diaphragm pump**
 - Combines higher pressure of a piston pump with extended life span of a diaphragm pump
- **Viton™ seals for increased durability**
 - Stands up to harsh chemicals
- **Use with liquids and many wettable powders**
 - Versatility
- **Parts available for easy repairs**
 - MS-40BD was not repairable

EASY TO MAINTAIN

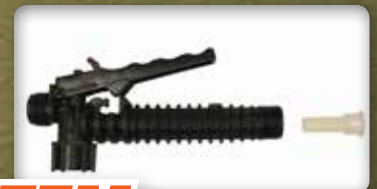

- **Large 6" ID cap opening**
 - Largest in the market

EASY TO OPERATE

- **3-stage filtration**
 - Extends pump life
- **28" stainless steel wand with brass nozzle**
 - For extended reach

COMFORTABLE TO USE

- **Double-thick shoulder straps**
 - Adds additional comfort

3-STAGE FILTRATION SYSTEM:

Stage 1: removable basket in the tank opening filters fluids as they are added to the tank

Stage 2: removable in-tank filter features double the surface area of the MS-40BD filter for less clogging

Stage 3: removable filter on inlet side of shut-off valve is easy to clean
